

PUBLIC ANNOUNCEMENT – 24th MARCH 2023

METROPOLITAN POLICE CRIME NUMBER : 6029679/21

We are calling for the above case to be reopened after MP Andrew Bridgen's speech in Parliament on 17th March 2023, where he cited government data proving beyond doubt that the MRNA Covid 19 vaccines and boosters are causing more harm than benefit.

“The data is clear, for all healthy people and all those considered at risk under 70, there is a greater risk of harm and chance of adverse effects from taking the experimental vaccine / boosters than there is of dying from covid”.

The case was lodged on 20th Dec 2021, and the complaint alleges (amongst other things) misfeasance and misconduct in public office, gross negligence manslaughter, corporate manslaughter, murder, conspiracy to murder, genocide and crimes against humanity.

The police 'reviewed' the 1000's of pieces of evidence until February 2022, they issued a statement to say they had found no evidence to support the complaint. They didn't even contact one of the many internationally acclaimed scientists and lawyers who all assisted with gathering the evidence (Robert F Kennedy Jr and Dr Michael Yeadon an ex-CSO of Pfizer, to name only two of them). Nor did they contact any victims that have been injured from the covid vaccine.

It is clear to see that a colossal cover-up has been perpetrated against the people of the UK. If the police had done their job as the people asked, it would have certainly saved lives and a great deal of money. Many millions of pounds of taxpayer's money has been used to buy these vaccines and boosters, they are not effective in preventing Covid, do not stop transmission, nor are they 'safe'.

We appeal to Sir Mark Rowley to reopen the investigation.

We ask you to review the evidence for yourself:
